## **DETAILED ACTION**

1. The Applicants' response filed on December 19, 2005 was received. Now, Claims 1-13 are pending.

2. The text of those sections of Title 35, U.S. code not included in this action can be found in a prior Office Action (Paper No. 100105).

### ***Double Patenting***

3. Rejections under double patenting rejection are maintained because the rejection is adequately set forth in paragraphs 3 and 4 of Paper No. 100105.

Applicants do not intend to address these rejections at the mean time because they are presently only provisional. Therefore, these rejections are still pending.

### ***Claim Rejections - 35 USC § 103***

4. Rejection of Claims 1-13 under 35 USC 103(a) as being unpatentable over Hayashi (JP 2002-060691) in view of Nobe (JP 2001-098218) is maintained because the rejection is adequately set forth in paragraph 9 of Paper No. 100105.

Art Unit: 1712

Applicant's arguments have been fully considered but they are not persuasive. The focus argument related to the core patentability is discussed below.

For Applicants' argument (Remarks, page 5, last paragraph to page 6, 1<sup>st</sup> paragraph), Hayashi does teach a porous film because as mentioned in Paper No. 100105, Hayashi teaches the use of organic polymers such as polyacrylate, etc. ([0033]-[0034]), which are typical porogens in the art. For example, Nobe teaches similar polymers as porogens. ([0015])

For Applicants' argument (Remarks, page 6, 2<sup>nd</sup> to 5<sup>th</sup> paragraphs), Nobe do not specifically teach the vaporization of the porogen under inert atmosphere. As such, the porogen vaporization process is deemed to be performed in a conventional manner, i.e., without any modification of the atmosphere and under air that contains oxygen. Especially, Nobe evaluates the vaporization of the porogen in air. ([0032])

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the

Art Unit: 1712

end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
